Digital Transaction Management Market, By Component (Hardware, Software, Services), By Type (Authentication, e-Signature, Non-Repudiation, Workflow Automation) and By Application (BFSI, Healthcare, Retail, Government) - Forecast 2023

Market Synopsis of Digital Transaction Management Market:

Market Scenario:

Digital transaction management refers to management of document based transactions digitally. It helps in making the work processes more fast, efficient and convenient. With growing popularity of internet and growing number of active internet users, digital transaction management market is expected to witness high growth rate during the forecast period. Increasing implementation of IT security and adoption of cloud based services are the factors responsible for driving the growth of digital transaction management market.

Major factors driving the growth of digital transaction management market are the growing emphasis on consumer experience in organization and growing advancement in digital technology. Rise in security concerns for digital business transaction is another major factor driving the growth of digital transaction management market. Adoption of digital transaction management will reduce the burden of maintaining paper documents and managing them. This could be another major factor driving the growth of digital transaction market.

Digital transaction management market has been segmented on the basis of component, type and application. The type segment is further bifurcated into authentication, e-signature, non-repudiation and workflow automation. Digital transaction management provides improved scalability and efficiency by entirely eliminating paper based processes. This can help in reducing costs and can make the processes way more secured. Digital transaction management can be extremely beneficial for businesses in order to simplify their work processes.

The Global Digital Transaction Management Market is expected to grow at approx. USD 125 Billion by 2023, at 31% of CAGR between 2017 and 2023.
