Description:

Global Detergent Alcohol Market: Information by Source (Natural and Synthetic), Application (Domestic & Industrial Cleaning, Cosmetics & Personal Care, Pharmaceutical, Wastewater Treatment, Plasticizer and others) and Region (North America, Europe, Asia-Pacific, Latin America and the Middle East & Africa) - Forecast till 2025

Market Overview

The global detergent alcohol market is expected to register a CAGR of over 6.5% to reach around USD 11 billion by the end of 2025.

Detergent alcohols can be categorized as natural and synthetic alcohols. Natural detergent alcohols (fatty alcohols) are obtained by converting fatty acids to non-acidic intermediate methyl esters and then hydrogenates these to alcohols. Artificial detergent alcohols are derived from petrochemical sources.

Detergent alcohols find use in numerous applications such as domestic & industrial cleaning, personal care, pharmaceutical, wastewater treatment chemicals, plasticizer, and others. Among the applications above, domestic & industrial cleaning is the significant revenue-generating application for the detergent alcohols market due to their increasing use as non-ionic surfactants in detergents.

Increasing environmental regulations against the use of chemicals in detergents have been imposed by governments across the globe, owing to which detergent manufacturers are increasingly using natural oils over chemicals, which is likely to fuel the demand for natural detergent alcohols.

The global demand for detergent alcohols is mainly driven by increasing adoption of fatty alcohols in household detergents such as laundry powder and liquid detergents, hard surface cleaners, and dishwashing liquids. The growing preference for surfactants based on natural oils, coupled with rising awareness regarding the maintenance of hygiene, is projected to drive market growth during the forecast period.

Natural detergent alcohols are being widely used in the cosmetics and personal care industry as emollients and thickening and cleansing agents as they help improve the viscosity of lotions and creams. The growing cosmetics and personal care industry in Asia-Pacific, with a surge in demand for premium skin and hair care products, child beauty care products, and color cosmetics, rising per capita disposable incomes, and changing lifestyles are expected to boost the growth of the global detergent alcohol market.

Growing preference for liquid table detergents and concentrated liquid detergents over powder detergents in China as the former offer strong cleaning capability and promote healthy skin is likely to create lucrative opportunities for the players operating in the global detergent alcohols market. However, fluctuations in prices of raw materials are likely to affect market growth.

Key Players

Some of the key players operating in the global detergent alcohol market are SABIC (Saudi Arabia), Kao Corporation (Japan), SASOL (South Africa), Musim Mas Holdings (Singapore), Univar Inc. (US), Ecogreen Oleochemicals (Singapore), Emery Oleochemicals (Malaysia), Royal Dutch Shell PLC (Netherlands), BASF SE (Germany), KLK Oleo (Malaysia), Procter & Gamble (US), Godrej
Industries Ltd (India), and Wilmar International Ltd. (Singapore) among others.

Regional Analysis

The market in Asia-Pacific accounted for the largest share of the global detergent alcohol market in 2018 and is expected to witness significant growth during the review period. The growing industrial base in the developing countries has resulted in increased demand for detergents and thus, detergent alcohols. Additionally, expanding the plastic industry on account of rising demand for plastics in numerous end-use industries such as healthcare, packaging, and automotive, among others.

Europe is projected to be the prominent market for detergent alcohol on account of the increasing regulations on the use of chemicals in the manufacturing of detergents. For instance, the International Association for Soaps, Detergents, and Maintenance Products established by the European Commission has set limitations regarding the extent to which phosphates and other phosphorus compounds can be used in laundry detergents and automatic dishwasher detergents.

The market in North America is expected to witness significant growth during the review period. The prevalence of strong cosmetics and personal care industry, coupled with a surge in demand for organic cosmetics products, is supporting the market growth in the region.

The Latin American market is expected to exhibit considerable growth concerning the growing industrial base coupled with rising per capita disposable income of the consumers. The Middle East & Africa is likely to witness moderate growth during the review period with growing end-use industries such as cosmetics & personal care, plastics, and surfactant.

Segmentation

The global detergent alcohol market has been segmented based on source, application, and region.

Based on the source, the global market has been segregated into natural & synthetic.

Based on application, the global market has been categorized as domestic & industrial cleaning, cosmetics & personal care, pharmaceutical, wastewater treatment, plasticizer, and others.

The global market, by region, has been segregated into North America, Europe, Asia-Pacific, Latin America, and the Middle East & Africa.

Intended Audience

- Detergent alcohol manufacturers
- Traders and distributors of detergent alcohol
- Research and development institutes
- Potential investors
