Spinal Traction Market Information, by Types (manual spinal traction, mechanical spinal traction) by applications (slipped discs, bone spurs, degenerative disc disease, herniated discs, facet disease, sciatica, foramina stenosis, pinched nerves) by devices (continuous traction, gravity-dependent traction, manual traction) - Forecast to 2022

Study objectives of the Market:

- To provide detailed analysis of the market structure along with forecast for the next 7 years of the various segments and sub-segments of the spinal traction market.
- To provide insights about factors affecting the market growth.
- To analyze the market based on various factors- price analysis, supply chain analysis, porters five force analysis etc.
- To provide historical and forecast revenue of the market segments and sub-segments with respect to the main geography and its countries - North America, Europe, Middle East & Africa.
- To provide country level analysis of the market with respect to the current market size and future prospective.
- To provide country level analysis of the market for segments by types, by applications, by devices and its sub-segments.
- To provide overview of key players and their strategic profiling in the market, comprehensively analyzing their core
competencies, and drawing a competitive landscape for the market.

- To track and analyze competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, new product developments, and research and developments in the market.

**Intended Audience**

- Spinal Traction equipment manufacturers & Suppliers
- Traction device manufacturers & Suppliers
- Hospitals and laboratories
- Academic research institutes

**Market Synopsis of the Market:**

**Market Scenario:**
Spinal traction is a procedure of decompression therapy that releases pressure on the spine. It can be executed manually or mechanically. Globally the market for spinal traction is expected to grow at the rate of about XX% from 2016 to 2022.

**Key Finding**

- The European market is expected to reach $XX billion by 2022.
- Anticonvulsant medication holds the largest share of XX% of the Spinal Traction market.
- North America holds the largest market share of XX% of Spinal Traction and is expected to reach $XX billion by the end of forecast period.
- Asia Pacific is expected to be the fastest
Segments:
Spinal Traction market has been segmented on the basis of types which comprises of Manual spinal traction, Mechanical spinal traction. On the basis of applications the market is segmented into slipped discs, bone spurs, degenerative disc disease, herniated discs, facet disease, sciatica, foramina stenosis, pinched nerves and others. On the basis of devices the market is segmented into continuous traction, gravity-dependent traction, manual traction, others.

Regional Analysis of the Market:
Globally North America is the largest market for spinal traction. Europe is the second-largest market and Asia Pacific is expected to grow at a rapid rate.

Key Players for the Market:
Some of the key players in this market are: DJO Global, STOLL Medizintechnik GmbH, RS Medical, Hill Laboratories Company, Mettler Electronics Corp, Antalgic-Trak, Medtronic and others.
