Description:

Global Automotive Fuel Delivery Market by Component (Fuel Pump, Fuel Injector, Fuel Pressure regulator, Fuel Filter, Fuel Rail, Air control Valve, Throttle position sensor) by Fuel type (Gasoline, Diesel and Alternative fuels), by Vehicle (LCV, HCV, Passenger and Hybrid), and by Region (North America, Asia-Oceania, Europe, Middle-East & Africa, South America).

Market Synopsis of Global Automotive Fuel Delivery System

The function of the fuel delivery system is to supply and store fuel to the engine. The Automotive fuel delivery system comprises of many essential components which aid in proper fuel delivery and smooth functioning of engine.

The major factors driving the market includes increase in the production of passenger and commercial vehicles, demand for efficient fuel delivery system and need for the alternative fuels such as LPG, CNG etc. In addition, increased life span of vehicles has also fueled the growth of the market. However, Increase emphasis on the usage of electric vehicles is the major constraint to the market growth.

The global automotive fuel delivery system market is poised to grow at 5% CAGR.

Study objectives of Global Automotive Fuel Delivery System Market

- To provide detailed analysis of the market structure along with forecast for the next 10 years of various segments and sub-segments of the Global Automotive Fuel Delivery System Market.
- To provide insights about factors affecting the market growth.
- To analyze global Automotive Fuel Delivery System market based on various factors- price analysis, supply chain analysis, porters five force analysis etc.
- To provide historical and forecast revenue of the market segments and sub-segments with respect to four main geographies and their countries- North America, Europe, Asia-Oceania, Rest of world.
- To provide country level analysis of the market with respect to the current market size and future prospective.
- To provide country level analysis of the market for segment by technology, by end-user, by channel of distribution and by region.
- To provide strategic profiling of the key players in the market, comprehensively analyzing their core competencies, and drawing a competitive landscape for the market.
- To track and analyze competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, new product developments, and research and developments in the Global Automotive Fuel Delivery System Market.
Regional Analysis of Global Automotive Fuel Delivery System Market

Asia-Oceania dominates the global automotive fuel delivery system market due to factors such as presence of global automobile original equipment manufacturers (OEM's) and even various mid-level companies are planning to expand their hubs in the region. North America is expected to be the fastest growing market during the forecast period. The sophisticated manufacturing hubs and market in terms of technology is expected to drive the market in the region.

Key Players

Continental AG, Robert Bosch GmbH, Delphi Automotive Plc., Magneti Marelli, Denso Corporation, Infineon Technologies AG, Ti Automotive INC, NGK Spark Plug Co. Ltd, UCAL Fuel Systems, Toyoda Gosei are some of the leading players operating in this market.

Target Audience

- Manufacturers
- Raw Materials Suppliers
- Aftermarket suppliers
- Research Institute / Education Institute
- Potential Investors
- Key executive (CEO and COO) and strategy growth manager

Product Analysis

- Product matrix which gives a detailed comparison of the market for different recycled product types

Additional Information

- Regulatory Landscape
- Pricing Analysis
- Macroeconomic Indicators

Geographic Analysis

- Geographical analysis across 15 countries

Company Information

- Profiling of 10 key market players
• In-depth analysis including SWOT analysis, and strategy information of related to report title
• Competitive landscape including emerging trends adopted by major companies

The report for The Global Automotive Fuel Delivery Systems Market of Market Research Future comprises of extensive primary research along with the detailed analysis of qualitative as well as quantitative aspects by various industry experts, key opinion leaders to gain the deeper insight of the market and industry performance. The report gives the clear picture of current market scenario which includes historical and projected market size in terms of value and volume, technological advancement, macro economical and governing factors in the market. The report provides details information and strategies of the top key players in the industry. The report also gives a broad study of the different market segments and regions.
