Global Skim Milk Market Research Report Information: by Type (black, white, green, others), Packaging (loose, bag, Instant, bottled & canned, others), Form (powder, leaf, others), Distribution channel (food retail, food service), Region-Forecast Till 2023

Market Scenario

Global skim milk market is expected to grow significantly from 2018 to 2023, owing to the rising health concern among consumers and the increasing demand for milk and milk products with low fat content. Skim milk or skimmed milk is obtained by removing the milk fat from whole milk. This milk fat is also referred to as the milk cream. Skim milk is processed with the help of a centrifugal separator machine where the whole milk is spun to separate the fat globules from the milk. Skim milk appears to be more transparent than whole milk and has a slightly bluish color.

The skim milk market is rapidly growing since skim milk has fewer calories than whole milk and it provides the same amount of protein and calcium as compared to whole milk. Skim milk is a good source of potassium that contributes to muscle growth, better nerve function, and healthy blood pressure. The magnesium content of skim milk helps the heart, muscles, and immune system to function properly. Skim milk is a healthier option than whole milk especially for the health-conscious consumers, which is driving the market growth. Skim milk manufacturers are innovating different flavors and packaging of the products to create more demand among consumers.

The global skim milk market is segmented into North America, Europe, Asia-Pacific, and Rest of the World (RoW). North America holds the largest market share in the global skim milk market followed by Europe. Increasing use of skim milk in the food industry has led to the growth of skim milk market in this region. High living standards and increasing health conscious people of this region have raised the demand for skim milk owing to its low fat content.

Europe has contributed a decent revenue share to the skim milk market owing to increasing application of skim milk in food industry especially bakery in this region. High consumption of dairy products as food as well as a beverage is driving the market growth of skim milk in this region. Due to rising demand of skim milk, new establishments have emerged in this region making skim milk as one of the main traded products to be exported to other parts of the world.
