Egg Products Market Global Research Report by Type (Egg Powder, Liquid Egg and Frozen Egg), Application (Food & Beverages, Personal Care and others) and Region (North America, Europe, Asia-Pacific and Rest of the World) - Forecast till 2024

Market Scenario

The global Egg Products Market is projected to register a significant growth rate of 6.31% from 2019 to 2024 and reach a market value of USD 2.53 billion by the end of 2024. Egg products are produced and processed from raw eggs. Spray drying is a method to produce dry powder egg by treating it with hot gas rapidly. Dehydration is done by removing water content from the raw eggs at a high temperature and is also ensured that any of the components are not lost. This process helps achieve long shelf life of the product. Industrially, egg products act as an alternative to regular eggs on the basis of flavor, nutritional value and several functional values. Egg products are widely used in baked products, sauces & dressings, and sweet & savory snacks among others. Diverse application of eggs in food products followed by increasing demand for processed and protein-rich food among consumers are directly influencing the growth of egg powder market across the globe.
