Dermal Fillers Market Research Report by Type (Botulinum toxin, Hyaluronic acid, Polymers & particles, and Others), Application (Facial line correction treatment, Face-lift, Lip treatments, and Others), and Region (North America, Europe, APAC, and RoW)–Global Forecast to 2023

Market Snapshot

Multiple dermal fillers have come up over the years, these filler materials are used in different areas of the face and have varying functionalities. The global dermal fillers market is currently valued at over USD 4,900 Mn. Facial aesthetic is now a global phenomenon, with demand for procedures such as face-lift and facial line correction picking up pace in countries such as China, India, Japan and Brazil among others. Meanwhile, aesthetic companies continue to post strong growth in the U.S. and Europe. The dermal fillers industry is evolving consistently - inclusion of new materials, new injection techniques, and new filler devices have allowed facilitation of highly complex procedures. Moreover, increased acceptance of tissue fillers worldwide is reflecting favorably on the business climate for market players. The number of people undergoing such procedures has increased substantially owing to a combination of factors such as expanding geriatric population, rising disposable income and improved procedure quality.

Report Synopsis

This MRFR report offers a detailed analysis of the global dermal fillers market along with a six-year (2017-2023) revenue projection. It also includes a thorough observation of the pertinent market elements such as drivers, restraints, opportunities and challenges. A revenue analysis based on different types of dermal fillers such as hyaluronic acid, collagen, botulinum toxin and polymers & particles is also available in the research document. The application areas for dermal fillers considered in the report include lip treatments, facial line correction treatment and face-lift.

Companies Covered

ALLERGAN, GALDERMA, Dr. Korman Laboratories, Integra Lifesciences, Merz Pharma, Sinclair Pharma and Teoxane Laboratories.

The report offers insights on the leading market players and evaluates their current market share. Company information with regards to revenue, segmental share, geographical income, SWOT, growth strategies, new product launch, M&A activities, and the latest R&D initiatives is also available in the report.

Research Methodology

Market Research Future (MRFR) leverages advanced statistical techniques for studying every micro and macroeconomic element that influences the expansion process of markets and industries. Key market observations such as historical data, past trends, latest developments, etc. are covered in the reports for a detailed assessment. Market analysis offered is backed by data procured from extensive primary and secondary research, which comprises of interviews with stakeholders across the value chain (CEOs, VPs, MDs, etc.), surveys, multi-lingual questionnaires, SEC filings, paid database services, whitepaper references, and annual reports published by market participants among others. Furthermore, cutting-edge analytical algorithms are employed for the extrapolation of accurate quantitative values associated with the market size and its major segments. A multi-layer verification process validates the quality of the information that is obtained.

Other Description
For the scope of the research, MRFR's report offers a comprehensive segmental analysis of the global market for dermal fillers

**By Types**

- Botulinum toxin
- Hyaluronic acid
- Polymers & particles
- Collagen

**By Application**

- Facial line correction treatment
- Face-lift
- Lip treatments

**By Region**

- North America
- Europe
- Asia Pacific
- The Middle East & Africa (MEA)
- Latin America

**Intended Audience**

- Dermal fillers manufacturers
- Dermal fillers providers suppliers
- Medical research laboratories
- Research and Development (R&D) Companies
- Market Research and Consulting Service Providers
- Potential Investors
