Market Synopsis of natural functional food

Market Scenario

The global Natural Functional Food Market is expected to be driven by the rising prevalence of chronic diseases among the consumers both in the developed and developing economies. Increasing prevalence of chronic diseases is enforcing consumers to shift towards healthy and nutritional food consumption. Additionally, the advancement in product development coupled with the technological advancement is considered to be one of the significant reasons for the rising growth of natural functional food during the review period of 2017-2023.

Functional food offers extra micronutrients, which include vitamins, minerals, fatty acids, and other essential elements. They are the medicated foods, which helps to enhance immunity systems and minimizes the chances of chronic diseases such as diabetes, cardiac diseases, cancer, obesity, and others. Natural functional food is prepared and processed without synthetic fertilizers or pesticides and does not contain any artificial flavors, colors or preservatives. Natural functional food has to meet the strict standards set by the regulatory bodies to state that all the ingredients used are 100% organic certified. The rising concerns regarding the nutritional food coupled with the rising aging population are expected to fuel the demand for natural functional food.
