Market Synopsis of Global Menopause treatment Market

Market Scenario

Menopause is termed as the stage of the end of the fertile phase in women which generally occurs at the age of 40 in almost 85% of women. Menopause results in reduced estrogen production and increased gonadotropin, resulting in the cessation of their menstrual cycle and menstrual flow. These physiological changes result in vasomotor symptoms. Vasomotor symptoms are transition between two phases which are peri-menopause and menopause. The major symptoms associated with menopause are as follows

Hot flashes - Hot flash is the most frequent symptoms of menopause which causes feeling of intensity of heat and excessive sweating.

Formication - Formication in an abnormal skin sensation, itchiness, tingling or burning on the skin and other.

Migraine - Migraine is intense headache which can last from few hours up to many days generally affecting one side of the head. Migraine is a direct effect of hormonal fluctuations of menstrual cycle.

Psychological symptoms associated with menopause are fatigue, anxiety, irritability, mood swings, insomnia etc. Other symptoms of menopause are dysfunctional uterine bleeding, disturbed sleep pattern and others.
The market drivers for global menopause treatment market are rise in population, increasing awareness regarding women health, development of healthcare and gynaecology centres, and development in drugs especially the advancements in hormonal drugs etc. The market restraints are the complications of drug treatment such as osteoporosis, bleeding, high cost of treatment, etc.

The global menopause treatment market is expected to reach USD 3.3 billion by 2023, and the market is projected to grow at a CAGR of ~ 4.2 % during the forecast period 2017-2023.

Regional Analysis

The Americas account for a significant market share owing to high expenditure on the healthcare. Additionally, the fastest uptake of new products in the US drives the menopause treatment market. Furthermore, concentration of the major healthcare companies in the developed countries of this region coupled with large insurance penetration is adding fuel to the market growth. Moreover, the US expend high amount on its healthcare, which accounts for 16% of total GDP, that also increases the sale in menopause treatment market.

Europe is the second largest market in the world due to high income and strong healthcare penetration. The European market growth is led by countries such as Germany and France. The UK is expected to be the fastest growing market over the assessment period. The strong pharmaceutical industry in Germany is a strong driver behind the dominance of this country in Europe.

Asia Pacific region is expected to grow rapidly; China and India are likely to lead this market due to fast growing healthcare sector and large unmet needs over the forecast period. South East Asian countries such as
China, India, and Malaysia are projected to contribute highly to the market growth. The growing penetration of healthcare insurance in the Asia Pacific region is expected to drive the future menopause treatment market in the region.

Gulf nations such as Saudi Arabia and the UAE are estimated to drive the Middle East & African market. Other Middle East nations to watch out for are Kuwait, Jordan, Egypt and Iran. The African region is expected to witness a moderate growth owing to poor economic and political conditions, and poor healthcare development.
