Asia Pacific Respiratory Therapeutic Devices Market Forecast to 2023

Market Synopsis of Respiratory Therapeutic Devices Market:

Market Scenario:
Respiratory therapeutic devices are the instrument or the devices used to treat the respiratory diseases. These therapeutic devices are used in the treatment of chronic and acute respiratory diseases such as Asthma, COPD, tuberculosis and many more. Respiratory devices market is continuously growing in Asia Pacific region due to increasing number of cases of respiratory problems and is expected to growing with a healthy rate of ~9.5%. Increasing population has increased the pollution and different air borne disease which has serve as a driving factor for the increase in the respiratory therapeutic devices market.

Different types of respiratory therapeutic devices are present in the market. Positive airway pressure (PAP) is the most famous and widely used device in the Asia Pacific region. While high cost of the product and lack of awareness about management of respiratory diseases can hamper the growth of the market.

Study Objectives of Asia Pacific Respiratory Therapeutic Devices Market:

- To provide detailed analysis of the market structure along with forecast for the next 6 years of the various segments and sub-segments of the Asia Pacific Respiratory Therapeutic Devices market
- To provide the detail information about drivers and factors restraining the market growth.
- To analyze Asia Pacific Respiratory Therapeutic Devices Market based on various factors- price analysis, supply chain analysis, porters five force analysis etc.
- To provide historical and forecast revenue of the market segments with respect to main geographies and their countries.
- To provide the trends and opportunities in respiratory therapeutic devices
- To provide country level analysis of the market with respect to the current market size and future prospective
- To provide overview of key players and their strategic profiling in the market, comprehensively analyzing their core competencies, and drawing a
Regional Analysis

On regional basis Asia Pacific is segmented into Japan, China, India, Australia, Republic of Korea and Rest of Asia-Pacific. Increasing prevalence of diseases has increased the respiratory therapeutic device market. According to COPD foundation, it was estimated that 6.2% of total Asia Pacific population is suffering from COPD. And COPD will be the fifth leading cause for death till 2020. India has 30 million COPD patient while 8% of total china population is suffering from COPD due to increasing pollution.

Segments:

Asia Pacific Respiratory Therapeutic Devices market has been segmented on the basis of:

- By types of respiratory therapeutic devices used which includes- Nebulizers (Mechanical Nebulizer (Soft mist inhaler, Human powered nebulizer) and Electrical Nebulizer (Jet nebulizer, Ultrasonic wave Nebulizer and Other), Humidifiers (Bubble Humidifiers and Electrical Humidifier), Oxygen Concentrators (Continues Oxygen Concentrators and Portable Oxygen Concentrators), Ventilators (Volume-cycled ventilators, Pressure-cycled ventilators, Flow-cycled ventilators and other), Gas Analyzers, Capnographs, Positive airway pressure (Continuous Positive airway pressure, Automatic Positive airway pressure and Other ), Masks (Nasal Mask, Full Face Mask and Other) and others devices
- By technology used which includes Electrostatic Filtration, HEPA Filter, Hollow Fiber Filtration, Microsphere Separation and others
- By end user they are Hospital and Homecare
- By Countries they are Japan, China, India, Australia, Republic of Korea and Rest of Asia-Pacific.

Intended Audience

- Respiratory Therapeutic Devices Suppliers
- Respiratory Therapeutic Devices manufacturers
- Research and Development (R&D) Companies
