Description:

Global Dysmenorrhea Treatment Information, By Type (Primary, Secondary), By Treatment (Non-Steroidal Anti-Inflammatory Drugs (NsAIDs), Hormonal, Combined Oral Contraceptive), By End User (Hospitals And Clinics, Diagnostic Centers, Pharmaceutical Companies And Others) - Forecast To 2023

Study Objectives:

Main objective of this research is to provide information about the products, their application and their end users

- To provide detailed analysis of the market structure along with forecast for the next six years of the various segments and sub-segments of the Dysmenorrhea Treatment market.

- To provide insights about factors affecting the market growth.

- To analyze the dysmenorrhea treatment market based on various factors- Price Analysis, Supply Chain Analysis, Porters Five Force Analysis etc.

- To provide historical and forecast revenue of the market segments and sub-segments with respect to four main geographies and their countries- Americas, Europe, Asia-Pacific and Middle East and Africa.

- To provide country level analysis of the market with respect to the current market size and future prospective.
• To provide country level analysis of the market for segments by type, by treatment, by end users and its sub-segments.

• To provide overview of key players and their strategic profiling in the market, comprehensively analyzing their core competencies, and drawing a competitive landscape for the market.

• To track and analyze competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, new product developments, and research and developments in the global Dysmenorrhea Treatment market.

Intended Audience

• Dysmenorrhea medicine suppliers

• Dysmenorrhea medicine manufacturers

• Research and Development (R&D) Companies

• Medical Research Laboratories

• Diagnostic centers

• Academic Medical Institutes and Universities

Figure 1: Research methodology for Dysmenorrhea Treatment market:

Figure 2: Market Synopsis of Dysmenorrhea Treatment Market by end user, 2016 (%):
**Market Scenario:**
Dysmenorrhea is a medical term for painful menstruation. Many women suffer from pain in lower abdomen during menstruation. This is due to low hemoglobin levels in women’s and lack of nutritious diet taken by women. Women nowadays have to cope up with both physical and mental stress due to personal issues and other work related problems. Most of them consult a physician for various reproductive disorders. The demand for the treatment of dysmenorrhea is increasing due to increasing reproductive disorders in women, irregular menstrual cycle, increase in lifestyle disorders and addiction to smoking deteriorating their physical and mental health. Lack of awareness about the treatment regarding various reproductive disorders and use of medications for their treatment also contribute for the growth of this market. Women in developed countries face many health issues due to lifestyle changes and many develop diseases related to reproductive health which favors the growth of this market in developed countries across the globe. Risk of developing serious disorders, if the disease remains untreated, would increase in demand of treatment in hospitals. Global market of Dysmenorrhea Treatment is expected to reach US$ 8.40 billion in 2023 from US$ 5.68 billion in 2016 with a CAGR of approximately 12.28% during the forecast period 2017-2023.
