Description:

Global Clinical Nutrition Market, by Type (Infant Nutrition, Enteral Nutrition and Parenteral Nutrition)- Forecast 2027

Market Synopsis of Clinical Nutrition Market Scenario

With the increasing aged population, the clinical nutrition spends are estimated to increase in the future. Due to the weak digestive framework at an old age, it becomes difficult for human body to digest all the required nutrients, from food. Among aged population, the loss of appetite is considered a major issue; due to which, the elderly population does not get necessary amount of nutrients. Therefore to get sufficient supplements, the confidence of the aged population towards clinical nutrition support, is growing. The global clinical nutrition market is going up because of high birth rate, raise in the number of victims receiving malnutrition treatment, and high number of premature births.
